

Radiology AI Program

A comprehensive AI strategy looking beyond development of products

Adopting an AI Program

The value in having a comprehensive AI program—not simply a product—is that a program has been strategically compiled and clinically integrated to improve healthcare outcomes and drive return on investment. The Canopy Partners Radiology AI program allows health systems to expand their IT portfolio in a way that is integrated with clinicians and IT/workflow, while keeping their internal resources dedicated to the patient experience and allowing the partner to implement and manage the AI life cycle.
